

To our loyal web site readers

- an apology for the lack of input over the past few months.

It has been a disappointing summer in Ontario.

First of all, the weather has been anything but summery.

There has been plenty of wet and very little warm, so our dreams of golfing, geo-caching and swimming would probably not have come true even if circumstances had allowed us the time to pursue them.

That, perhaps is the good news!

When we arrived back from the Suite Owners Rally in Goshen (which was a ton of fun and very educational), we decided to sign up for a seasonal site at the beautiful Science Hill Golf and RO Resort. It is definitely a well kept secret as, other than long weekends, there are very few campers, the scenery is great and the lots are quite spacious.

Once we settled in Maureen took a trip to London to pay a surprise visit to her Mom. When she arrived and found Mom all alone she decided that the golf and swimming would have to wait. To make a very long story short, Mom now has a lovely room in a Retirement home, most of the □stuff □has been removed from the house which has been redecorated and put up for sale.

It took almost 2 months, a lot of time and sweat to accomplish all this, but things are looking better every day.

During July and August Maureen and Mike lived at the house in London far more than in the fifth wheel, so only a few games of golf were played.

It's on the market now!!!!!!!!!!

*Finally on August 11th we were back at the camp site,
the weather co-operated, and 18 holes of golf were played.*

**3rd hole - 160 yard - par 3
Mike put it on the green with a 6 iron
Very lucky shot!**

What Class!

What Style!!!!!!

Now
All I have to do is ????????

*Getting a great score was not the object that day.
Making it through to the end was enough to make us very happy.*

A few days later, Martin and Teana came for a visit and brought along their new puppy who they have named "Asker". Percy did not quite know what to make of her at first but he finally figured out that she was just a baby and not a "squeaky toy".

On day 2, Martin and Mike put together a shed to house all of our summer equipment. Martin did most of the assembly, Mike read the instructions and brought the tools, so it went together quite nicely.

**Just relax, Dad!
I'm gettin' to it!**

**It's all in how
you hold your tongue**

On Friday Charlie came to stay for the weekend while Matt and Kimmy enjoyed and ☐Adult Only ☐ camping weekend in Simcoe.

We took Charlie Geo-caching. The first 2 stops were rather disappointing as we could not find anything, but persistence paid off as the 3rd stop had a very nice cache. The hint through us off a bit but we eventually figured it all out.

□ *Charlie*
chooses to take
the dino

☐ *Charlie finds a micro cache!*

We liked our spot at Science Hill but we kept eying the corner lot at the end of the block. All of the other lots facing the golf

course were occupied but this one was vacant so we decided to make a move and take it while the going was good. We moved the trailer a week ago and are quite happy with the new location. Most of the time there are no campers on our door side and there is nothing but trees and golf course on the other side.

Our picture window at the back looks west with a view of the sunset through the trees as well as the beautiful flowers on the side of the neighbours deck.

Percy is quite happy as he can see his new girlfriend, Bindy, out the side door.
